Skills & Expertise

Security & Compliance: ISO 27001:2022, PCI DSS v4.0, SOC 2 Type II, RBI Data Localization Compliance, Endpoint Security, IAM, SSO, EDR, MDM, SIEM, VAPT, WAF, Security Automation, Threat Detection & Response.
DevSecOps & Automation: Jenkins, Docker/ECS, Kubernetes/EKS, Ansible Semaphore, Power Automate, Snyk, Trivy**.**
Cloud & Infrastructure: AWS, Azure, GCP, FortiGate Firewall & VPN, Cloudflare**.**
Monitoring & Logging: Wazuh, Prometheus, Grafana, ClamAV, NTP, Uptime Kuma, Microsoft Sentinel.
Programming & Scripting: Python, Bash, Java, SQL, YAML, Go.
Tools & Platforms: Git/GitHub, Gitlab, VSCode, Neovim, WSL, VirtualBox, Wireshark, Burp Suite, Linux (Arch/Kali/Ubuntu).

Experience

DevOps Engineer NIIT Limited *Feb 2026 – Current*

- *Modernized multi-cloud infrastructure across AWS and Azure, managing 110+ VMs and 10+ enterprise applications; reduced Azure spend by ~60% (₹20L → ₹8L/month) and AWS costs by ~25% (₹6L → ₹4.5L/month) through rightsizing, consolidation, archival strategies, and migration to open-source alternatives.*
- *Migrated source control and CI/CD workflows from AWS CodeCommit/CodeBuild to self-hosted GitLab with GitLab Runners, integrating automated security and quality gates (Trivy, SonarQube, Snyk) for container scanning, static analysis, and vulnerability detection.*
- *Replaced legacy monitoring stack (Pingdom, OpManager) with a centralized open-source observability platform using Grafana, Loki, Prometheus, Fluent Bit, and Uptime Kuma; built alerting pipelines via AWS SNS, SendGrid, Microsoft Teams, and Telegram.*
- *Designed containerized browser-based bastion infrastructure using Apache Guacamole on Linux, migrating 50+ developers from legacy Windows bastion/VPN workflows and eliminating associated licensing overhead.*
- *Containerized modernized backend services with Docker, developed GitLab CI/CD pipelines replacing manual deployments, and authored Infrastructure-as-Code for a Next.js/Strapi/Fastify platform using Pulumi and AWS ECS.*
- *Decommissioned 20–30 legacy servers and migrated managed Redis and database backup workloads to existing infrastructure, reducing recurring cloud service costs.*
- *Led modernization of legacy .NET Framework applications on Windows toward Node.js-based containerized services on AWS Linux environments.*

Associate DevSecOps Engineer Castler *Jul 2024 – Jan 2026*

- *Implemented Microsoft Intune org-wide with 30+ Zero Trust policies and integrated SSO with conditional access across 10+ apps, strengthening identity governance and reducing credential sprawl.*
- *Deployed Microsoft Defender EDR, Sentinel SIEM, and XDR for unified threat detection, automated response, and cross-domain investigations—reducing incident detection & response time by 60%.*
- *Managed ECS/Docker workloads, optimized CI/CD pipelines (Azure DevOps → Jenkins), automated vulnerability scans (Snyk, Trivy), and reduced deployments from 10–30 mins → 5–15 mins.*
- *Designed and implemented Wazuh SIEM as the main monitoring platform for all production cloud resources (EC2, RDS, CloudWatch, CloudTrail); built 100+ custom alert rules and Grafana + Prometheus dashboards with multi-channel alerts (Teams/Discord/Telegram). Integrated Wazuh monitoring with AWS multi-account governance and adhered to AWS FTR best practices.*
- *Authored Ansible playbooks for OS/system hardening and infrastructure configuration across Linux servers (Amazon Linux, RHEL 9, Ubuntu 22/24), ensuring secure and consistent deployment.*
- *Led cost optimization across AWS, Azure, GCP, Cloudflare, and Microsoft 365, achieving 87% reduction in Azure spend and 30%+ AWS savings.*
- *Replaced Uptime Robot with Uptime Kuma and implemented multi-channel alerting (email, Teams, Telegram, SMS), cutting annual monitoring costs by $180.*
- *Centralized AWS multi-account governance, enforced tagging, IAM Identity Center SSO, and DNS routing for secure, compliant operations.*
- *Solely completed RBI Data Localization Compliance and led PCI DSS 4.0, ISO 27001:2022, SOC 2 Type II, and external bank audits; conducted quarterly VAPT, BCP/DR drills, and org-wide security training.*

Education

B.Tech. CSE, Amity University Lucknow — CGPA: 8.27 *Sep 2020 – Jun 2024*
Class XII, City Montessori School — 95% *Apr 2018 – Mar 2020*
Class X, City Montessori School — 90% *Apr 2016 – Mar 2018*

Certifications

SQLi Attacks by EC Council

Docker Fundamentals by Cantrill

Introduction to Cybersecurity by Cisco

CCNA: Introduction to Networks by Cisco Security
